# Docker Volume and Port Mapping Lab Exercise

## Name
Kavindhra

## Objective
- Create Docker Volumes
- Deploy Nginx using Volume Mapping
- Verify Data Persistence
- Deploy MySQL using Volume Mapping
- Verify Database Persistence

## Scenario 1 - Nginx Volume Persistence

### Create Volume

docker volume create mydata

### Run Nginx Container

docker run -d --name nginx-container -p 8080:80 -v mydata:/usr/sh

### Verify Volume

docker volume ls

### Verify Container

docker ps

### Delete Container

docker stop nginx-container
docker rm nginx-container
```
